

SERGI CORBERA

Set & Costume Designer / Art Director

BIO

Barcelona, 9/4/1979.

I design scenographies and conceptualize spaces, linking a wide range of artistic projects from set and costume designing to art directing for TV commercials.

To me, set design means a collective adventure of inventiveness and intimate creativity in order to create evocative imaginary spaces that are full of truth, sense and poetry. I always work from the premise that the function of design is not merely to illustrate the performed text, music or movement, but to provide a further layer of visual narrative. I enjoy inventing new playing rules in every project, in every challenge, and transforming the set – enabling it to becoming one more character–. I seek audience to question itself: What I am going to see next? What will be revealed?
